Our highly skilled and certified engineers in Sun Solaris and Red Hat Linux operating systems are of great value to any customer that needs a stable infrastructure for their Oracle environment. Although we focus on Oracle, we also provide these services to any customer who needs Linux or Unix support.

Some of our service offerings in this space include:

- Day to day administration of your Unix and Linux environment
- Implementation, upgrade or migration to Linux and Unix
- Pro-active monitoring of the environment
- Best practice advice to ensure a stable production environment
- Post-implementation audit
